Email: sufiyaan.s2024@gmail.com
Portfolio: https://sufiisarkaar.github.io/sufiyan/docs/portfolio/

CAREER OBJECTIVE:

Seeking a growth-oriented position where I can leverage my technical knowledge, skills, and proactive attitude to contribute to the continuous development and success of the organization. I aim to be resourceful, innovative, and flexible in delivering value while advancing professionally.

TECHNICAL SKILLS:

Programming Languages	JavaScript, Typescript, Data Structure and Algorithms.
Back-end	Node JS, Rest API's, ExpressJS and Microservices .
Front-end	Angular, Angular Material UI. React, ReactNative
Web Technology	HTML, CSS, CSS3, SCSS and Bootstrap.
Database	MYSQL, MONGODB and POSTGRESQL.
Query Language	SQL
Cloud	AWS EC2, AWS S3 Bucket and AWS Lambda.
DevOps	CI/CD Pipeline, Docker, Jenkins, kubernetes and Confluence.
Agile	Jira, Scrum, Agile Meetings.
SCM / version control	Git, Github, Bitbucket and Gitlab
UI Editor	Visual Studio Code, Sublime Text Editor, Brackets, Atom and Notepad.
Operating systems	Windows (7/8/10,11), UBUNTU, Linux and Mac OS

WORK EXPERIENCE:

Apprich Technology

Software Developer
March 2021 – Present

- Developed and maintained robust web applications using the MEAN/MERN stack (MongoDB, Express.js, Angular, Node.js),(MongoDB, Express.js, React, Node.js), ensuring timely project delivery.
- Implemented RESTful APIs and microservices to enhance application functionality, scalability, and performance.
- Designed and developed responsive user interfaces using Angular, React, HTML, CSS, and Bootstrap, focusing on usability and accessibility.
- Integrated Angular Material, React Material UI components to improve UI design and functionality, enhancing user experience.
- Leveraged Node.js for server-side development, managing backend logic and database operations efficiently.
- Proficiently utilized MySQL and MongoDB databases for data storage, retrieval, and management.
- Collaborated closely with cross-functional teams to analyze requirements, troubleshoot issues, and implement effective solutions.
- Actively participated in code reviews, testing, and debugging processes to maintain high code quality and optimize application performance.
- Utilized Git and GitHub for version control, ensuring seamless collaboration and efficient code management within the development team.

Professional Project:

JOBSQO (Job Search Website)
2022 - Present

Conceptualized and developed an innovative job-search website facilitating connections between job seekers and recruiters in Dubai.
Orchestrated meetings with recruiters to enhance opportunities for job seekers, bridging the gap between employers and talent.
Designed and implemented user-friendly features to streamline the job search process, optimizing user experience and engagement.
Collaborated with a diverse team of developers and designers to ensure seamless functionality and visual appeal of the platform.
Successfully marketed the platform to a targeted audience, increasing user base and visibility within the job market.

Technologies Used:
Front-End: Angular 8, Angular Material, HTML, CSS, Bootstrap
Back-End: Node.js, MySQL, REST API

Responsibilities:
Developed front-end components using Angular 8, Angular Material, HTML, CSS, and Bootstrap, ensuring responsive design and optimal user experience.
Implemented back-end services and APIs using Node.js and MySQL for efficient data handling and management.
Ensured application functionality, performance, and security through rigorous coding, testing, debugging, and documentation practices.
Collaborated closely with stakeholders to gather and analyze business requirements, translating them into technical specifications.
Estimated project timelines and resource requirements, facilitating on-time delivery and successful implementation.

Unicrafts - (E-commerce Application)
2021 - Present

Unicrafts is a dynamic e-commerce platform tailored for home appliance products. It empowers customers with intuitive browsing, searching, and purchasing capabilities. Users can add items to their cart, create personalized accounts, and filter products by cost, brands, categories, and subcategories. The platform includes a chat feature for customer support and enables sellers to register, offering products via both direct sales and a marketplace model. Admin functionalities encompass order management, payment processing, customer support, and system maintenance.

Technologies Used:
Front-End: Angular 8, Angular Material, HTML, CSS, Bootstrap
Back-End: Node.js, MySQL, Express, MongoDB, REST API

Responsibilities:
Developed and maintained front-end components using Angular 8, Angular Material, HTML, CSS, and Bootstrap, ensuring responsive design across various devices.
Implemented RESTful API calls between front-end and back-end systems, ensuring seamless data flow and functionality.
Collaborated with team members to integrate front-end and back-end functionalities, ensuring consistent user experience and system performance.
Coded, debugged, tested, and documented application programs to maintain high standards of functionality and performance.
Gathered and analyzed business requirements, translating them into technical specifications to guide development efforts.
Estimated project timelines and resource requirements, contributing to effective project planning and delivery.

Quizzer App

Client Techybirds Project, January 2024

Developed a dynamic quizzer application for TechBirds, leveraging Node.js for backend development to manage quiz data efficiently.

Designed interactive and responsive quiz interfaces using Angular for the front-end, ensuring optimal usability across various devices.

Integrated MySQL for robust data storage and management, ensuring scalability and performance of the application.

Conducted rigorous testing and debugging to maintain high functionality standards and ensure a smooth user experience.

Collaborated closely with the TechBirds team to meet project requirements and deliver a feature-rich quizzer application on schedule.

Technologies Used:

Front-End: React , Material UI, HTML, CSS, Bootstrap

Back-End: Node.js, MongoDB, REST API,ExpressJS

Responsibilities:

Developed and maintained responsive front-end components using REACT, HTML, CSS, and Bootstrap.

Implemented RESTful API calls to ensure seamless data flow and enhance application functionality.

Collaborated with cross-functional teams to integrate front-end and back-end systems for consistent user experience.

Conducted thorough testing, debugging, and documentation to uphold high standards of performance.

Translated business requirements into technical specifications, guiding effective development efforts.

Estimated project timelines and resource needs, contributing to successful project planning and delivery.

ACADEMIC QUALIFICATIONS:

QUALIFICATION	INSTITUTE	UNIVERSITY/BOARD	BATCH	PE
B.Tech/B.E.	Mahakal Institute of Technology, Ujjain	Rajiv Gandhi Proudyogiki Vishwavidhyalaya, Bhopal	2020	**75%**

SOFT SKILLS:

- Languages understood: English, Hindi, Urdu.
- Punctual with deadlines and have a professional approach.
- Hardworking with a "Never Give Up" attitude.
- Like to face challenges and work under pressure.

DECLARATION: I hereby declare that declare that all the information mentionabove is true in depth of my knowledge.
